Risks associated with the Issuer being a special purpose vehicle - The Issuer is a special purpose vehicle that was established for the purpose of issuing bonds and subsequently providing intra-group financing. The Guarantor's financial statements for the years ended 31 December 2025 and 31 December 2024 have been audited with an "unqualified" opinion.			
Key risks specific to the Guarantor and the Group	Risk factors specific to the Guarantor and the Group include in particular the following legal and other facts: 1. Risk of the Guarantor being a holding company – The Guarantor is a holding company and its economic results are dependent on the business of its subsidiary Fortuna Entertainment Group, a.s. and its other subsidiaries which carry on the business of the Group, principally under the Fortuna, Casa Pariurilor, PSK and LOB brands. In addition to the sale of its own assets, in particular shares in its subsidiaries, the Guarantor cannot generate resources from its own business activities to repay its		

	<p>obligations to the Issuer, i.e. to enable the Issuer to repay its obligations arising under the Bonds, or to repay its obligations arising under the financial guarantee issued by the Guarantor.</p> <p>2. Risk arising from economic developments, inflation and their impact on the purchasing power of the population – The results of operations and financial performance of the Group may be adversely affected by factors relating to economic developments in the countries in which the Group operates which cannot be objectively predicted and which are beyond the control of the Group, in particular political, economic and social factors, such as the economic policies of the countries in which the Group operates, the growth or decline in gross domestic product, inflation trends, monetary and tax policies, exchange rates, interest rates, unemployment, the purchasing power of the population and the general level of investment in the countries in which the Group operates.</p> <p>3. Regulatory risks, risk of changes to or potential loss of licences or exclusive rights to operate the Group’s business activities – The regulatory environment in jurisdictions in which the Group operates may change in the future, and any such change could have a material adverse effect on its business, results of operations, financial condition and prospects. The legal, compliance and regulatory departments of the Group strive to ensure compliance with all applicable rules and regulations in the relevant jurisdictions and oversee obtaining, maintaining and compliance with the relevant licences and concessions. However, if the Group is unable to, or fails to, comply with all applicable regulatory requirements, this could also result in a material adverse effect on its business, results of operations, financial condition, and prospects.</p>

3.4 What are key risks that are specific to the securities?

Key risks that are specific to the Bonds	<p>Risk factors specific to the Bonds include in particular the following legal and other facts:</p> <p>1. Risk of acceptance of further debt financing by the Issuer or Guarantor – The Joint Terms and Conditions contain restrictions regarding the volume and conditions of further unsubordinated debt financing of the Issuer or the Guarantor, but various exceptions to these restrictions are set out to enable the acceptance of further debt financing. The acceptance of any additional debt financing may ultimately mean that, in the event of insolvency proceedings, the claims of the Bondholders on the Bonds will be satisfied to a lesser extent than if such debt financing had not been accepted. With the increase in debt financing of the Issuer or the Guarantor, the risk that the Issuer may default on its debts arising under the Bonds or the ability of the Guarantor to meet its obligations under the Financial Guarantee may be threatened.</p> <p>2. Risk associated with the structural seniority of FEG’s debt – A substantial portion of the Group’s debts are at the level of FEG and are therefore structurally senior (i.e. in order of satisfaction) to the Issuer’s obligations under the Bonds and the Guarantor’s obligations under the Financial Guarantee. This means that in the event that a liquidation order is made in respect of FEG, its bankruptcy is declared, an insolvency petition is adjudicated, granted, a moratorium is declared or a reorganisation or bankruptcy petition is granted, Bondholders will only be entitled to satisfaction out of the assets of FEG after all creditors of FEG, including creditors under loan agreements and trade creditors, have been satisfied and a portion of the remaining assets have been distributed to the Guarantor as shareholder of FEG.</p> <p>3. Liquidity risk – Notwithstanding the intention to admit the Bonds to trading on a regulated market, there can be no assurance that the Bonds will in fact be admitted to trading, that a sufficiently liquid secondary market will develop or, if one does develop, that such secondary market will be sustained. The fact that Bonds may be admitted to trading on a regulated market will not necessarily result in greater liquidity for such Bonds than for Bonds not admitted to trading on a regulated market.</p>
