Who are we?

KB Advisory and ENVIROS are KB Group member companies specializing in consulting services for ESG, energy, environment, and financing for sustainability projects. We help organizations grow and profit from opportunities through the implementation of sustainable and socially responsible business strategies. We provide all-inclusive consulting services to clients from both the private and public sectors in regard to investment and non-investment projects executed in every corner of the Czech Republic.

How can we assist you?

Sustainable Business

Our all-inclusive business consulting services cover all facets of sustainability and corporate social responsibility. We will introduce you to ESG, perform an ESG audit, devise an ESG strategy, and prepare an action plan for its execution. We will set metrics for mapping the impact of the implemented measures and for non-financial reporting. Our services include determining the carbon footprint, preparing carbon reduction plans or complete decarbonization, and proposing financing for individual measures.

ADVISORY

Energy Efficiency

Our all-inclusive energy consulting services, ranging from the initial analysis to solution implementation, will help you prepare energy-saving projects with a view to improving the efficiency of your business operations. We provide energy assessments, audits, and energy performance certificates, and devise energy solutions using renewable and secondary energy sources, as well as feasibility, energy-saving, and energy-security studies. We will help you implement and run an energy management system. Our consulting services also cover EPC and PPA projects, as well as compliance with energy-related legal requirements, including inspections of HVAC systems.

Resource Management

Our consulting services encompass a broad range of environmental issues, where the aim is to optimize the use of resources within your organization. We will assist you with water management analyses, studies, and audits, including the use of rainwater, ground water, waste management, and the implementation of circular economy principles. We will prepare technical and environmental due diligence studies. Our services include EIA, IPPC, and BREEAM building certification.

Subsidy Consulting

Our all-inclusive subsidy consulting services ensure the successful, problem-free completion of your investment projects. Our services include analysing eligibility for subsidies, performing an initial assessment, filing an application, administering projects throughout their sustainability term, communicating with the subsidy provider, and organizing requests for proposals.

Sustainability Project Financing

We will help you select the best financing for your projects, including such sustainable financing options as the Green Loan or Sustainability Linked Loans. Thanks to our consulting services, your projects will be ready for financing in conformity to the EU Taxonomy.

How?

Contact us directly, or request assistance from your relationship manager. We will arrange an appointment with our expert, who will review your situation, perform an initial analysis, and propose the optimal course of action, all **FREE OF CHARGE**.

Our Locations

- KB Advisory and ENVIROS experts are available in every region of the Czech Republic.
- Contact information can also be found at www.kbeupoint.cz and on the Společně udržitelně sustainability website.
